DETAILED ACTION

Drawings

The drawings fail to show the measurements D3 and D4. Correction is required. Figures 14 and 15 must be labeled "Prior Art".

Specification

Where is there antecedent basis for "the engine side engagement section",
In Claim 1, line 5, replace "head" with - -neck- -.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Figure 14 (admitted prior art).

Figure 14 shows a cover body 108, an engine side member 103, a cover side engagement section 106, a mounting seat 109, and an engine side engagement section 105. Element 106 is seen to be elastic and therefore will undergo elastic deformation during a collision as required in claim 15. In regard to claim 16, everything is "fragile" according to a particular standard; element 109 will be destroyed if the collision is great enough. The collision load set forth in claim 14 has no objective standard; hence any load may read on it.

Allowable Subject Matter

Claims 1-13 are allowed.
